

DIRECTIONAL DRILLING & FISHING SOLUTIONS

FRANCE

OUR VALUES

We believe real success comes from strong values and working together. Respect, teamwork, and caring for the environment are at the core of what we do. Beyond our technical work, we aim to make a positive impact by supporting the people and places around us.

Enedril is more than just a service company; it's a team focused on making a real difference.

Our goal is to help build a more sustainable future. We are working to change the energy industry, creating cleaner and more responsible energy solutions for future generations.

OUR PURPOSE

Supporting the next generations in the energy transition by contributing to the production of more responsible energy.

DIRECTIONAL DRILLING

ABOUT US

Enedril is a drilling services company operating internationally in geothermal energy and underground storage sectors. Specializing in directional drilling, fishing operations, and downhole tool design, we offer advanced technical expertise tailored to the specific needs of each project.

Our **custom tools** are engineered to withstand the most demanding conditions, ensuring optimal performance while respecting defined timelines and budgets. Enedril stands out with an approach that combines precision, durability, and adaptability for reliable and secure execution.

OUR EXPERIENCE

57 200 meters drilled

Geothermal, O&G, Gas storage

32 wells drilled

Up to 3 000m TVD

136 Fishing, Workover and P&A

Geothermal, O&G, Gas storage

1 800
tools

300
operations

33
collaborators

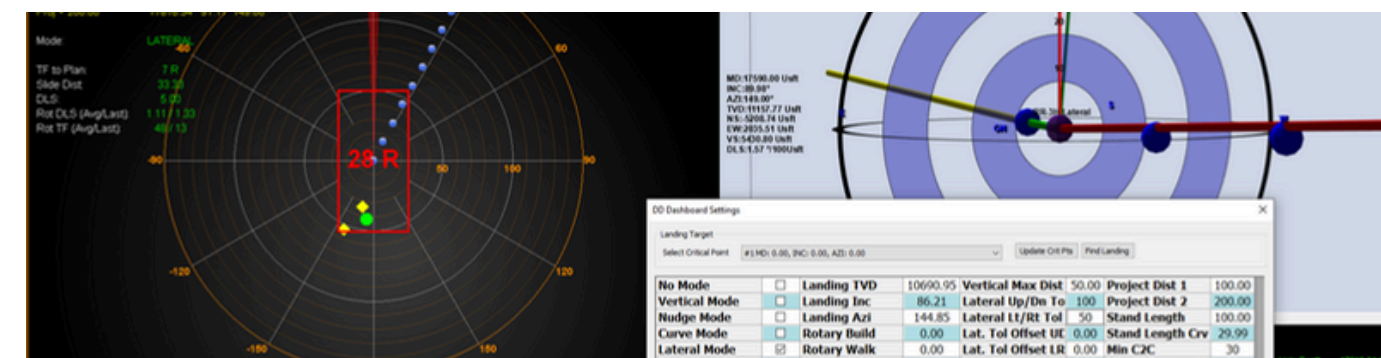

MWD KITS

We offer multiple MWD kits with HT electronics (up to 200°C) for accurate, real-time data collection in challenging conditions. High-frequency data recorders enable comprehensive downhole logging for optimized trajectory management.

MOTORS (PDM AND RSS)

PDMs are available from 3 1/8" to 9 5/8" with a wide range of power sections, including high-temp stators, to meet specific drilling needs. We also use RSS technologies (Push-the-bit and Point-the-bit) for precise directional control and efficient navigation in complex formations.

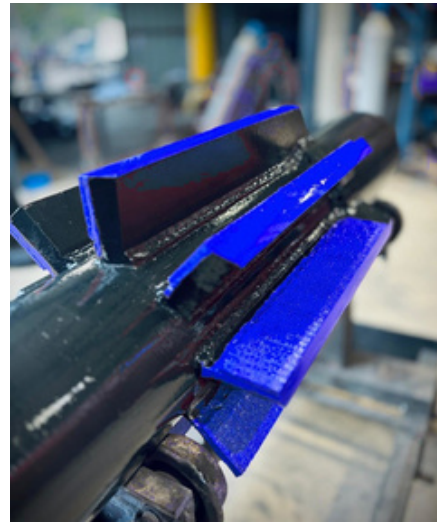

WELL PLANNING (INNOVA SOFTWARE)

Using advanced software like Innova and DrillScan, we provide precise well planning, covering torque and drag, hydraulics, and anti-collision to ensure safe, efficient drilling aligned with project goals.

FISHING TOOLS

Our strength lies in providing specialized tools with agility. Thanks to our partnership with a machining company certified to API 5 & 7 standards, we design and manufacture our own tools, with the flexibility to create custom equipment tailored to specific applications.

When unexpected downhole obstacles or equipment failures occur, our fishing services team is ready to respond quickly and effectively. We have a proven track record of retrieving lost or stuck tools, ensuring minimal downtime.

We offer fishing services on-site, whether during drilling operations, **Workover (WO)** activities, or **Plug and Abandonment (P&A)** projects. Additionally, our fishing equipment is available for **rental or purchase**, meeting a wide range of operational needs.

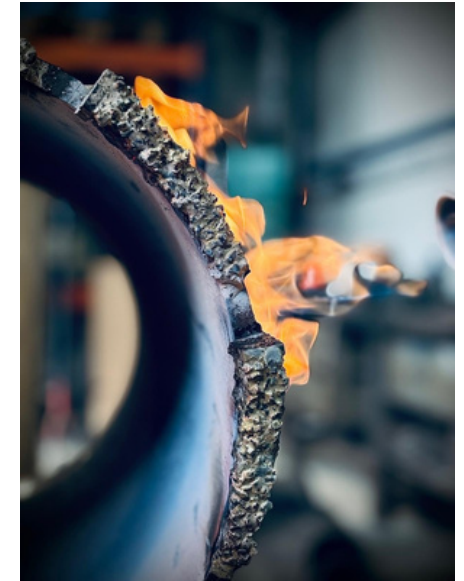

Impact
Cutting
Reaming
Milling
Tubular
Recovery
Stabilizers
Casing repair

Some of our fishing tools :

*Junk Sub - Junk Basket Reverse Circulation - Hydraulic Pipe Cutter
Section Mill - RTU & DTU - Fishing Jar - Shock Tool
- Economill - Pilot Mill - Taper Mill - Washover Shoe - Overshot - Hook - Spear - Drill Collar - Float Sub - Stabilizers - etc...*

DOWNHOLE TOOLS

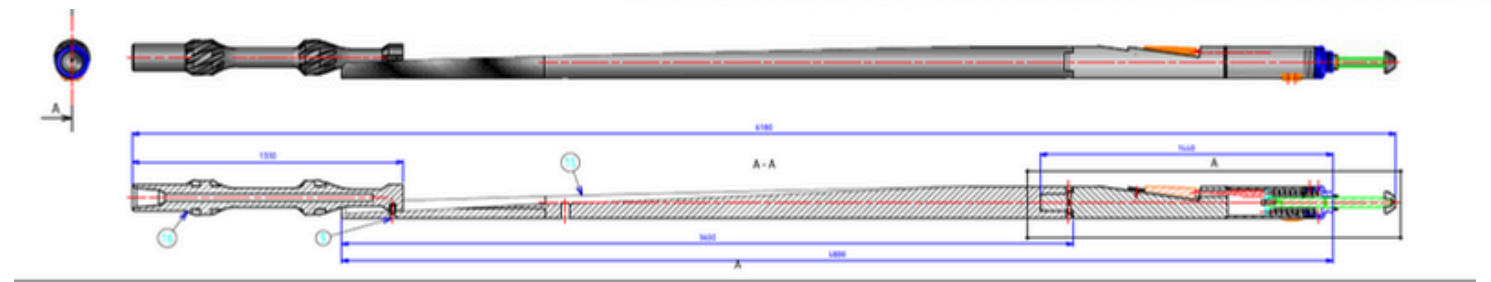

Downhole tools are essential for drilling operations, especially in demanding and complex conditions. They incorporate advanced technologies that optimize stability, precision, and durability during drilling, while enhancing the efficiency of interventions. Thanks to our expertise and partnerships, we are able to design custom tools tailored to the specific requirements of each operation.

We are able to design **custom tools.**

We can propose variety of different equipments such :

- Whipstock systems
- Drilling Bits (PDCs)
- Underreamers
- Drilling Jars
- Stabilizers
- Tubulars
- etc...

WHY CHOOSE US

EXPERIENCE

With years of experience in the industry, we have successfully completed a wide range of projects, earning the trust of clients across various sectors.

COMMITMENT TO EXCELLENCE

Our dedication to excellence, safety, and innovation ensures that we consistently deliver superior results.

CUSTOM SOLUTIONS

We understand that every project is unique. Our ability to provide tailored solutions sets us apart, enabling us to address your specific challenges effectively.

RELIABILITY

When you choose Enedril, you're choosing a reliable partner who is always ready to go the extra mile to meet your needs and deadlines.
